Umbrella Table Brace UBRACE

Material

The solid surface 36.25" diameter table top is 12-gauge steel with a durable 1.5" square steel tube edge design.

The two contour seats are 12-gauge steel with a .75" gap slotted pattern and feature a reinforced frame connection. Table top is designed to support up to 100 lbs. per square foot; seats will support up to 200 lbs. per linear foot.

The table frame and legs are made of 2.38" O.D. steel tubing and feature a built-in umbrella holder and steel anchor feet.

Features

The table top features a 1.64" diameter umbrella hole in the center.

Table is designed to be surface mounted using .5" diameter pre-drilled holes in the feet to prevent movement. **Surface mounting is required; mounting hardware is not included.**

Finish

Table top and seats are protected by the patented Fusion Advantage™ which is a heat fused plastisol coating with an average .125" thickness that creates an impervious rustproof barrier and resists UV deterioration, mildew, staining and fading. Plastisol is then encapsulated with a richly tinted, high-performance powder coating that won't rust, fade, peel, chip, crack, mold, or mildew. The finish has been tested to the requirements of ASTM E1354 and is in compliance with California Uniform Fire Code 1103.2.1.4.2.

Fade-resistant, powder coated steel frame and legs feature a state-of-the-art primer proven to prevent rusting. Treated components exceed the industry standard by 34% in testing by independent sources.

Assembly

This product requires some assembly. Stainless steel assembly hardware is included.
